

Space Is The Place

Welcome to my Space Is The Place™ home page. I have been interested in spaceflight all my life. Perhaps this resulted from my coming of age and developing an awareness of the larger world during the 1960's, when mankind made its first tentative steps beyond our protective Earth, decided that the Moon was the first goal, and BY GOLLY GOT THERE WITHIN THAT SAME DECADE!!! Pretty impressive for someone of my age in those years (I.e. 9 to 18), and prove to me that anything is possible. Mankind's destiny has to be in space.

- Ken R. Harman

"The dinosaurs were extinct because they didn't have a space program."
Arthur C. Clarke, science-fiction writer, visionary and author of 2001: A Space Odyssey™

My intention on this site is to convey my enthusiasm for spaceflight by describing the exciting visits I have made to space launch sites all over the world, and displaying some of the models of spacecraft and launch vehicles I have built over the past nearly 60 years, while reading what inspired me to build them, the stories behind the models (sometimes personal) and their importance in the political and technological history of spaceflight. My Space Is The Place website is a mixture of five main areas:

- [About Me](#) - details about myself, which include links to my many [YouTube](#) channel, my [Facebook](#) page, and my [Instagram](#) page.
- [My Models](#) - my Spacecrafts and some of the models I have built over the years.
- [Visits To Launch Centers](#) - which include a collection home (in chronological order) of my [third](#), [fourth](#), [fifth](#) and [sixth](#) pages.
- [After pursuing through these pages you acquire an increased sense of excitement about spaceflight and the potential it holds for mankind's future, then I will have achieved my goal.](#)
- [Note](#) - credit for the name of this website goes to the late jazz band leader, Chico Freeman and names of the planet Saturn (as he named it). [See Me, who Was a Song, Author and His "Space Is the Place"](#). I hope this is as fitting as we can make this on the web.

This site is dedicated to the memory of three dear friends who shared my passion for spaceflight: Ron Caswell 1954 - 2019, Butch Head 1952 - 2005, and Barry Shanks 1960 - 2020.

Edgar Mitchell visits "The Shrine" - In June 2008 I was honoured to have the late Dr. Edgar Mitchell, Apollo 14 astronaut and sixth man to walk on the Moon, visit my home, and in particular the "Shrine", where he signed the plaque in the room he was shown.
